PROFESSIONAL SUMMARY

Cloud and infrastructure professional with 2+ years of hands-on experience in Microsoft Azure, hybrid cloud environments, Microsoft 365 administration, and enterprise network engineering. Certified in PMP, Microsoft 365, and Data Center Infrastructure. Passionate about designing scalable, secure, and highly available systems that bridge technology and business outcomes.

EXPERIENCE

Simplelogix

Lahore, Pakistan

Assistant Infrastructure Engineer

February 2025 – March 2026

- Administered Microsoft 365 suite including Exchange Online, Microsoft Teams, and SharePoint, managing 100+ user accounts and mailboxes to ensure business continuity.
- Managed Azure cloud resources including Virtual Machines, virtual networks, storage accounts, and cloud services, optimizing cost and performance.
- Configured and maintained Microsoft Entra ID (Azure AD), enforced Multi-Factor Authentication (MFA), and managed role-based access controls (RBAC) to strengthen security posture.
- Monitored IT infrastructure performance and uptime using proactive alerting tools, reducing downtime incidents by maintaining SLA compliance.
- Managed core network services (DNS, DHCP, VPN), resolved connectivity issues, and performed LAN/WAN configuration including routing and switching.
- Executed patch management, system backups, and upgrades, ensuring infrastructure remained secure and up to date.
- Troubleshoot complex technical issues across cloud and on-premises environments, applying strong analytical and problem-solving skills.

Keltha

Lahore, Punjab, Pakistan

IT Support Engineer

January 2024 – February 2025

- Provided end-to-end IT support for hardware, software, and network infrastructure across the organization.
- Assisted in deploying and maintaining IT systems, contributing to streamlined operations and reduced ticket resolution time.
- Collaborated with cross-functional teams to diagnose and resolve escalated technical issues in a timely manner.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (VMs, VNet, Storage, Azure AD/Entra ID, RBAC, MFA)

Microsoft 365: Exchange Online, SharePoint, Microsoft Teams, Admin Center

Networking: DNS, DHCP, VPN, LAN/WAN, Routing & Switching, TCP/IP, Firewall

Infrastructure: Data Center Design & Operations, Hybrid Cloud, System Administration

Tools & Practices: Patch Management, Backup & Recovery, System Monitoring, IT Troubleshooting

Project Management: PMP-certified, Business Analysis, Process Management

CERTIFICATIONS

- Project Management Professional (PMP)
- Microsoft 365 Administrator
- System Administration & IT Infrastructure Services
- Data Center Infrastructure & Design
- Operation & Maintenance
- Business Analyst & Process Management

EDUCATION

Lahore Garrison University

Lahore, Pakistan

Bachelor of Science, Information Technology

January 2021 – January 2025
